Project Overview

Project Structure

Internet Commercial

Main Target?

Single-person-household

Sales What?

Instant & Retort food

Feature 1.

Categorize users with their taste

Feature 2.

Recommend food
based on categorization

Fooding
food+feeling

Part 2

Background

Single-person household

[그림 1] 1인가구의 규모 및 성장 전망

(단위: 만 가구, 만 명, %)

• 전체 가구수 대비

1/4 of households are single-person.

• 전체 인구 대비

1/9 of Korean people are living alone

자료: 통계청(인구총조사 2018, 장래가구추계 2015, 장래인구특별추계 2019, 총인구규모예상은 중위추계 기준)

Single-person household's Food culture

그림 2. 1인 가구 연령대별 식문화

Single-person household cost more to instant food.

주 1) 섭취량은 국민건강영양조사 원시자료 분석결과임.

Growing Instant Food Market

Problem 1: Taste

- How salty is this food?

- How spicy is this food?

It's hard to know specific taste without eating.

Problem 2: Allergic

We need friends like us

We need reviews from friends like us

YUCK!

MEH

GOOD

AWESOME!

Solution

**Categorizing
with Taste &
Allergic condition**

**Recommend
Based on
Categorization**
